

Transitioning to Adult Care

The doctors, nurse practitioners and staff thank you for choosing Hunterdon Pediatric Associates to provide your medical care. You are now at an age where it is time for you to receive your medical care from a provider who treats adults.

We want to make this transition as easy as possible for you. In this packet, you will find the following:

1. A list of Hunterdon Healthcare practices that care for adults.
2. A records release form to complete and return to us, once you have chosen your new medical practice. Please note that if you decide to see a Hunterdon Healthcare provider, you will not need to have your records transferred since the new provider will have access to your records through the NextGen electronic health record.

We will also provide you with a chart summary document that will include basic information about you including: current medical problems, past medical history and medications.

If you have complex medical problems, and you are not already receiving help from our Care Coordinator, Rebecca Milewski – 908-806-8222, we can have her call you and help you navigate through the process of transitioning to an adult provider.

Once again we thank you for the privilege of allowing us to provide your medical care and wish you all the best.
